

## 2009 OSCE School Report

Ontario College of Health and Technology

---

	School Average	Province Average
Remedial Exercise/Self-Care	82	71
Client Interview	82	76
Assessment 1	84	72
Assessment 2	72	54
Treatment Plan/Consent	84	83
Treatment	79	69
Technique	82	76
Overall Scaled Score Average:	85	79

Note: these are average scores across candidates. Therefore, interpretation should be limited to how the school's students perform on average across the content areas. There is not a passing standard for each station. Therefore it is a compensatory model where total points across all stations are compared to a passing standard to arrive at a final status.

**Remedial Exercise/Self Care:** The candidate is expected to assign specific therapeutic exercises and home-care to the client.

**Client Interview:** The candidate is expected to obtain a relevant case history by conducting a client interview.

**Assessment 1:** The candidate is expected to demonstrate their ability to perform specific assessment techniques (e.g. palpation, range of motion, neurological, orthopaedic testing, etc).

**Assessment 2:** The candidate is expected to conduct an assessment to determine the nature of the client's presenting dysfunction.

**Treatment Plan/Consent:** The candidate is expected to interact with the client to explain their treatment plan for initial and on-going treatment, and obtain informed consent.

**Treatment:** The candidate is expected to perform a focused massage therapy treatment, given the presenting case history and assessment findings.

**Technique:** The candidate is expected to demonstrate their ability to perform specific massage therapy techniques on specific anatomical structures.
